# SAVE EVEN MORE

---

## HERE ARE OTHER STEPS YOU CAN TAKE TO HELP YOU SAVE ENERGY AND MONEY.

- 1 Install a programmable thermostat to automatically lower your home's temperature at night and when you are away. It can cut as much as 8 to 10 percent from the amount of energy used to heat your home.
- 2 Cut the energy you use to heat water:
  - Turn your water heater temperature down to 120 °F.
  - Install blanket insulation on older water heaters.
  - Install energy-efficient showerheads and faucet aerators.
  - Wash clothes in cold water when possible.
- 3 Seal air leaks where you feel cold drafts.
- 4 Replace appliances with models that carry the ENERGY STAR® label.
