

**PROPERTY OWNER REQUEST FOR ADVANCE NOTIFICATION OF POSSIBLE
DISCONNECTION OF SERVICE**

I, _____ (owner) request that Columbia Gas of Ohio (Columbia) provide advance notification if gas service at my properties is scheduled for disconnection. Scheduled disconnection can be either by request of the customer of record or due to non-payment of the gas bill by the customer of record. Attached is a listing of all premises covered under this agreement.

I understand that:

1. Columbia cannot provide advance notification if gas service at any of the premises must be disconnected as the result of an unsafe condition at the premise.
2. Columbia cannot provide information regarding the reason for disconnection of service. Information regarding the disconnection must be obtained from my tenant.
3. Any changes, additions or deletions of the premises covered by this agreement must be made in writing to Columbia.
4. Cancellation of the advance notification service must be requested in writing to Columbia.
5. In order to provide this advance notification of gas service, requests for service from customers must be placed in advance. Customers of record who question the need for the advance notification will be referred to their property owner by Columbia for settlement of any perceived additional expense incurred by the customer for gas service.
6. The advance notification does not mean that disconnection will actually take place. Actions by the tenants or myself could eliminate the need for the scheduled disconnection of service.
